The attached illustration is a representation of what we are looking for in additional pavement markings in our rear parking lot.

- New pick-up drop-off parking slots along the west side grass should be appropriately sized.
- We are deleting the existing hash marks in two locations, east to west from the dumpsters to the new sidewalk and north to south along the center parking area. These have been greyed out on the illustration.
- New word markings will be "NO EXIT" at the east side entrance from the hill and "FIRE LANE NO PARKING" at the entrance to the alleyway between the buildings.
- The crosswalk markings from our new rear sidewalk to the corner of the handicap ramp are existing, but have been added since the last sealing/stripping project.
- We are adding an additional hashed out area from the last grass side parking slot, lined up with the south end of the fence line, up to the new crosswalk.
- Travel direction arrows are being added between the existing parking slots to guide vehicles to the rear exit. These arrows should match the existing elsewhere and will likely be curved around the corners as needed.
- All other markings in all the lots shall be repeated to match the existing.
